

HAIRONG LIU

202422089035@mail.bnu.edu.cn

RESEARCH INTERESTS

Human-Computer Interaction (HCI) , Game-based learning , Participatory design with children and families, STEAM education .

EDUCATION

Beijing Normal University, School of Future Design, China Sep2024–Jun2027
M.F.A.in Design Education (Advisor: Zhenyu Zhan)
GPA: 3.6/4.0
Qingdao University of Technology, School of Art & Design, China Sep2016–Jun2020
B.A.in Visual Communication Design
GPA: 3.45/4.0

RESEARCH & DESIGN EXPERIENCE

Monkey Scooping the Moon | LEGO and Shadow Puppetry STEAM Curriculum 2024-2025
Core Team Member
Beijing Normal University–LEGO collaboration | Project Lead: Peng Gao

- Independently developed a STEAM curriculum and LEGO–paper shadow-puppet toolkit integrating Lufeng shadow puppetry, curriculum standards, and the 5E Instructional Model.
- Contributed to replacing heavy, unstable LEGO puppet bodies with team-designed printed paper characters, retaining LEGO joint supports to improve stability and flexibility.
- Completed three design iterations based on project-lead feedback, refining the learning sequence and instructional materials.

“Pollen Express” STEAM Course | Team Lead 2026

- Led curriculum and visual design for a 45-minute activity for Grades 3–5, combining handcrafted flower models, pollination simulations, and Arduino-based feedback within the 5E Instructional Model.
- Developed assessment criteria distinguishing hands-on performance from conceptual explanations of pollination and relationships among insects, plants, and food.
- Implemented the activity with approximately 80 students at an elementary school science festival; documented observations and collected teacher feedback.

A Batch of Honesty | Home–School Communication Service Design 2024
Course Project

- Independently conducted six stakeholder interviews with a vice principal, a teacher, two students, and two parents; synthesized findings into personas and journey maps, identifying concerns about academic-performance discussions and formal meeting settings.
- Informed by interviews, firsthand experience of a baking activity, and background research, contributed to a shared baking proposal integrating activity, spatial, and visual design; independently produced service blueprints and storyboards specifying participant roles and interactions.

	Master's Thesis Educational Board Game Design for Children Based on Ecological Relationships in Bird Migration: A Study Set in Shenzhen Bay Wetland	In Progress
	■ Prepared a proposal for an educational board game for children aged 8–12, using ecological relationships in bird migration as the basis for design and Shenzhen Bay Wetland as the context. ■ Developed a research design combining gameplay observation, artifact analysis, and semi-structured interviews to examine rule comprehension, component use, and the clarity of ecological information.	
INTERNSHIP EXPERIENCE	Child Participation Intern , Beijing Normal University Children's Museum ■ Developed interview protocols and contributed to research involving 10 children and 6 education professionals; communicated observations of children's use of space to the design team. ■ Organized and analyzed interview data to identify needs and concerns raised by children and education professionals and inform museum design. ■ Adapted information across eight museum spaces using Save the Children guidance on child consultation and child-friendly communication.	2026
	UI Design Intern , Beijing Zhongying Huayuan Technology Co., Ltd. ■ Independently designed the UI for "R.D.D," a launched WeChat mini-program, including competitor analysis, high-fidelity interfaces, design guidelines, and a reusable component library.	2025
PROFESSIONAL EXPERIENCE	Art Teacher , Qingdao Hailanlan Art Training School ■ Taught comic drawing, sketching, and creative art activities to elementary school students, adapting instruction to age and experience.	Oct 2021–Jul 2022
	Graphic Designer , Full-time, Amesha Intelligent Technology Co., Ltd. ■ Produced packaging designs and illustrations; independently developed a children's mini-program proposal for Zhucheng Dinosaur Museum, covering user research, information architecture, and interface design.	Dec 2020–Jul 2021
AWARDS & HONORS	Second-Class Scholarship , Beijing Normal University, CNY 8,000 Outstanding Student Leader , Beijing Normal University, CNY1,000	Dec 2025 Dec 2025
SKILLS	Research Methods: Semi-structured Interviews , Field Observation , Interview Data Analysis Design: Curriculum Design , Service Design , Interaction Design , Visual Design , Video Editing Software: Figma , Adobe Illustrator , Adobe Photoshop , Jianying (Video Editing)
